For the month, BlackRock's performance was close to index across the four funds. BlackRock outperformed the International Index by 102 basis points for the year primarily due to the reversal of a fair value pricing adjustment on December 31, 2015 and also due to tax effect. BlackRock outperformed the Small Mid-Cap Index by 36 basis points for the year primarily due to securities lending. BlackRock outperformed the Fixed Income Index by 21 basis points for the year primarily due to securities lending.

The TSP Funds closely tracked the BTC Accounts for the month. The TSP Funds also closely tracked the BTC Accounts for the year, except for the International Fund due to higher trading costs.
